SUMMARY

DevOps Leader and AWS Solution Architect with 6+ years of progressive experience spanning cloud infrastructure, automation, and team leadership. Demonstrates extensive expertise in multi-cloud migrations and infrastructure optimization, notably leading a 4-person team in completing a zero-downtime GCP to AWS migration within 15 days. Proven track record in implementing cloud-agnostic solutions using Pulumi, Terraform, and AWS CloudFormation across mission-critical deployments. Recognized for mentoring capabilities and driving operational excellence, with particular strength in secure automation solutions and cost optimization across large-scale infrastructures.

EXPERIENCE

SDE-L3

CoffeeBeans 06/2024 - Present

- Extensively working with Pulumi to develop and manage cloud-agnostic infrastructure solutions.
- Managing existing infrastructure on Google Cloud Platform (GCP) for high availability.
- Successfully led migration of infrastructure from GCP to AWS.
- Led cross-functional teams in cloud-based infrastructure project delivery.
- Managed end-to-end infrastructure projects from requirement gathering to production deployment.
- Seasoned professional with extensive experience in disaster recovery planning, implementation, and testing, including successful design and deployment of robust DR solutions across multiple environments.

Assistant Project Manager

Thirrocktechkno 09/2022 - 06/2024

- Designed and implemented secure automation solutions.
- Extensive experience in AWS services for managing applications.
- Strong experience with Terraform and AWS CloudFormation.
- Led initiatives to improve DevOps processes and automation.
- Developed CI/CD pipelines and automated software delivery processes.
- Managing and mentoring DevOps teams, including training and onboarding freshers and junior engineers to excel in DevOps platforms and best practices.
- Configured and automated Kubernetes clusters on DigitalOcean, optimizing filesystem solutions tailored to client requirements for enhanced performance and scalability.

QUALITY ASSURANCE ENGINEER

Third Rock Techkno 11/2017 - 08/2022

- Proficient in AWS services like S3, EC2, IAM, and cross-region replication, with expertise in static website hosting, lifecycle policies, encryption, and advanced configurations such as CloudFront distributions and VPC setups.
- Skilled in designing secure, scalable infrastructure, including load balancers, RDS instances with Multi-AZ and read replicas, and encrypted root volumes shared across accounts.
- Skilled in managing snapshots, optimizing AMIs, and streamlining operations with lifecycle policies.
- Hands-on experience in DevOps pipelines, running end-to-end test cases, and collaborating with engineers to deploy and troubleshoot scalable cloud services.
- Strong QA expertise, managing test plans, test cases, and defect reporting while driving process improvements aligned with SDLC and STLC standards.
- Strong communicator with expertise in documentation, sharing best practices, and ensuring reliable, scalable infrastructure.

EDUCATION

Master in Computer Application

GLS University

08/2016 - 06/2018 Ahmedabad

CERTIFICATION

AWS Solution Architect

Validation Number :-

f3f9e884bc6c439a9636d073f4644ea8

SKILLS

Agile Methodologies CI/CD Pipelines

Configuration Management

Cloud Infrastructure Design Log Analysis

Microservices Architecture Cloud Security

Monitoring and Observability.

Cost optimization

Tools

Ansible AWS Services Bash

Bitbucket CloudFormation Terraform

Pulumi Docker ElasticSearch

ELK Stack GCP Git GitHub

GitHub Actions Firebase Grafana

IAM Jenkins Jira Kubernetes

Logstash Digitalocean

KEY ACHIEVEMENTS

Migration GCP to AWS

Successfully led a team of four to migrate entire infrastructure from GCP to AWS within 15 days, achieving zero downtime and seamless transition.
